# 🔥 *Welcome to* cre8ive.cv

*JSON-based resume design studio for IT professionals*

✉ feedback@cre8ive.cv                    in /in/patryk-palej

⌨ /cre8ive-cv                            🌐 palej.dev

*Status: ● Online | v0.2.0*

You are about to use **cre8ive.cv** – *a free tool for generating a highly customizable resume. Its data layer is just a pure JSON object which can be exported and reimported. Why developers love it?*

- **Flexibility:** *Go beyond themes. Use custom HTML in any field – the final look depends only on your* **cre8ivity***!*

- **Convenience:** *Real-time WYSIWYG interface with* **no user account** *needed*

- **Privacy focused:** *Client-side data storage (no personal data is stored on the server after PDF rendering)*

*/\* Any feedback? The project is vibe coded so bugs are possible. In order to **contact the author** use the links above or create an issue on the GitHub repository.\*/*

---

## ⚙ Features & Technology Stack

### Features

All your data in a single exportable JSON object

Optional photo is a part of the JSON (encoded as base64)    Live HTML preview

Export to PDF, HTML and JSON    Custom `HTML` support

Themes, colors and layouts    Toggle, reorder and rename sections

No personal data is stored on the server    No user account needed

No tracking cookies    Uses localStorage. Update is made after each change

You don't need to save your progress. It's kept until you 🗑 **Clear All Data**

Even if you close the browser or restart the computer

Free & Open Source (MIT license)    Self hosting available    CLI for local usage

Desktop-first with mobile support    Optional watermark to support the project

Gallery of templates to start with    Your resume can be version-controlled with Git

💡 **Protip:** You can combine your **cre8ivity** with `AI` to boost your `HTML` customizations

### Tech Stack

HTML / CSS

Node.js

Express

Puppeteer

Claude Code

Codex
